SUMMARY

BSc (Hons) Information Technology undergraduate specializing in Artificial Intelligence at SLIIT. Strong foundation in Java, Python, web development, database systems, and software engineering principles. Experienced in developing academic and personal projects involving full-stack web development, AI/ML concepts, and IoT systems. Seeking an internship opportunity to apply technical skills, gain industry experience, and contribute to real-world software solutions.

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT)

BSc (Hons) in Information Technology – Specialization in Artificial Intelligence, CGPA: 3.39 / 4.00

2024 – Present

Mahinda Rajapaksha College, Homagama

G.C.E Advanced Level (Commerce Stream with ICT), Results: A, A, C

2022/23

G.C.E Ordinary Level, Results: 9A Passes

2019

PROJECTS

AI-Powered Travel Planning System – Lanka Travels | (Technologies: Python (Flask), MySQL, HTML, CSS, JavaScript)

- Developed a web-based AI travel planning system that recommended the best destinations and hotels for tourists.
- Individually implemented an IT Service Ticket module with full CRUD operations (create, update, delete, track status) and input validation as my core contribution to the group project.
- Contributed to the machine learning workflow through data preprocessing, dataset preparation, feature engineering, and train-test data splitting for model development and evaluation.

Vehicle Rental Mobile Application (2026) | (Technologies: HTML, CSS, NodeJS, MongoDB)

- Built a vehicle rental mobile app with booking, user management, and vehicle listing features.
- Implemented CRUD operations for vehicle records, customer information, and booking transactions.
- Designed responsive UI and integrated backend services with MongoDB for efficient data storage and retrieval.
- Applied input validation techniques to improve system reliability and user experience.

Hotel Room Reservation System (Technologies: Java, JSP, Servlets, Maven, HTML, CSS)

- Developed a tourism management web application as group project and doing with user registration, authentication, profile management, and password recovery features.
- Implemented file-based data storage and session management.
- Collaborated within a team environment following software engineering best practices (Object-Oriented Programming concepts and CRUD operations.) and modular system design principles.

Web-Based Laundry Management System | (Technologies: Java, React, SQL, Tomcat)

- Developed a laundry management system supporting customer, staff, and administrator operations.
- Implemented full CRUD functionalities for user management with SQL database integration as core contribution for the group project.
- Applied object-oriented design principles and software engineering practices to develop a scalable and maintainable system.

MOVIE-SENTIBOT – NLP Sentiment Analysis System | Technologies: Python, Scikit-learn, Pandas, Kaggle Dataset

- Developed a Natural Language Processing (NLP) system to classify movie reviews as positive or negative.
- Utilized a publicly available Kaggle movie review dataset for model training and evaluation and Performed data preprocessing and exploratory data analysis.
- Trained and evaluated machine learning models for sentiment classification and performance comparison.
- Visualized insights and assessed the impact of preprocessing techniques on model accuracy.

IoT-Based Smart Greenhouse System | Tools and Technologies: Arduino, DHT11, LDR, Soil Moisture Sensor

- Designed an automated greenhouse monitoring system for monitoring water level, soil moisture and light intensity for basic environmental automation.
- Integrated sensors and actuators to automate real-world tasks and improve efficiency

TECHNICAL SKILLS

Programming Languages: Java, Python, C

Web Development: HTML5, CSS3, JavaScript, JSP, Servlets, React, Spring Boot

Databases: MySQL, SQL, File Handling, MongoDB

Software Engineering: OOP, CRUD Operations, Data Structures, Algorithms

Tools & Platforms: Git, GitHub, IntelliJ IDEA, VS Code, Maven, Apache Tomcat, Ubuntu Linux

AI & Machine Learning: Data Preprocessing, Model Evaluation, NLP Fundamentals, Machine Learning Basics

CERTIFICATIONS

Cisco Networking Basics

AI/ML Engineer - Stage 1 (SLIIT)

Web Development-2(Frontend Web Development) -University of Moratuwa

Web Development- 1 (web Design for Beginners) - University of Moratuwa Programming Python -

1 (Python for beginners) - University of Moratuwa

SOFT SKILLS

- Problem Solving • Teamwork • Communication • Adaptability • Time Management • Quick Learning
